Professional performance and ample power were two critical considerations that heavily factored into the design of the Hartke HyDrive 410 Bass Cabinet. The need for contemporary bassists to reach high volume levels with seamless performance is a common demand these days, but being able to do so with a durable, portable cabinet that weighs less than 70 pounds is practically unheard of. This is where the HyDrive 410 comes in.

With power to spare, the HyDrive 410 is an 8-ohm cabinet that features four 10" neodymium hybrid cone drivers for 1,000 watts of power handling. This HyDrive cabinet is beautifully appointed with a steel grill, steel corners, recessed handles and removable casters, making it both resilient and easy to transport. The HyDrive 410 is a dual-chamber, sealed cabinet constructed from the highest quality plywood with extensive bracing and dado joints, making it rigid yet lightweight for superior projection and true sonic clarity.

The HyDrive 410 is engineered for demanding players who need critical performance at intense volume levels. Perfectly suited for all styles of bass playing, the HyDrive 410 was specifically designed with the mid-range frequencies that rock players rely on night after night. With the power and versatility of Hartke's HyDrive speakers housed in a complementary enclosure, it's clear that the HyDrive 410 performs on a level far beyond ordinary bass cabinets.

### FEATURES

- Four 10" HyDrive paper/aluminum hybrid cone drivers
- Neodymium magnets
- 1,000 watts power handling
- 8-ohm cabinet impedance
- 1" titanium compression driver
- High frequency attenuation switch (On, -6dB, Off)
- Parallel Twist & Lock and 1/4" inputs
- 30Hz-17kHz frequency response
- Solid plywood cabinet construction
- Dual-chamber sealed cabinet design
- Perforated steel grill
- Inset carry handles
- Removable casters included
