

HYDRIVE 112

Bass Cabinet

PRODUCT INFORMATION

2015

©2015 Hartke. Preliminary Literature. All product descriptions and specs subject to change.

Expanding on the already inclusive line of HyDrive bass cabinets, Hartke introduces the HyDrive 112, a specially tuned, ported bass cabinet that employs a single 12" neodymium hybrid cone speaker. And to make the HyDrive 112 more accommodating for a variety of settings and playing styles, the speaker has been engineered as a dual-impedance driver, allowing you to switch between 4 and 8-ohm impedance levels for additional flexibility.

Offering a warm, solid bottom end that's never too boomy, the HyDrive 112 provides ample power handling in an extremely portable, lightweight enclosure (less than 35 pounds). With its 300-watt driver, this cabinet can bridge the gap between smaller, quieter gigs and big, loud shows. You can even add a second HyDrive 112 for enough power to shake the stage at nearly any venue.

Everything about the HyDrive 112 says roadworthy durability: power to spare, steel grill and inset side handles. The HyDrive 112 is a ported cabinet made from the highest quality plywood with extensive bracing and dado joinery, making it rigid yet lightweight with superior projection and true sonic clarity. The result is a strong, portable bass cab that will withstand heavy gigging while providing a contemporary and stylish aesthetic to any stage or studio.

FEATURES

- 12" HyDrive paper/aluminum hybrid cone driver
- Neodymium magnet
- 300 watts power handling
- Selectable impedance for 4 and 8-ohm operation
- 1" titanium compression driver
- High frequency attenuation switch (On/-6dB/Off)
- Parallel Twist & Lock and 1/4" inputs
- 41Hz-17kHz frequency response
- Solid plywood cabinet construction
- Ported cabinet design
- Perforated steel grill
- Inset carry handle
